

Nutech Paint
For a perfect finish!

NuPool

Introducing NuPool

NuPool is a premium coating for all domestic and commercial swimming pools, ponds, and fountains. It is a hard 2K gloss epoxy and is suitable for old and new surfaces.

Available in 13 standard colours with colour matching available by Nutech Paint, NuPool can bring any pool back to life.

NuPool can be used on previously painted or coated pools with proper preparation. Follow the Technical Data Sheet for complete instructions.

Two complete coats of NuPool are required to achieve the Nutech Perfect Finish. The final finish is tough and durable, lasting for many years.

Once cured, NuPool has a durable finish that helps to control algae.

With the addition of Nutech Anti-Slip between coats, NuPool can create a non-slip surface. This helps to ensure safety around the pool area for the whole family.

The 13 colour range is available as a 4 litre, 10 litre or 20 litre two part pack.
